

The Future of Power Management

Discover nPM1300 Power Management IC (PMIC)

Nordic Semiconductor

July 2023

Today's host

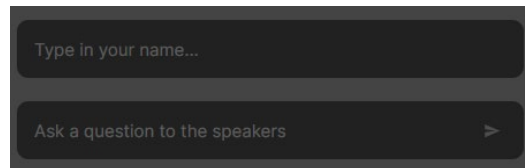

Geir Kjosavik

Product Director, Power Management

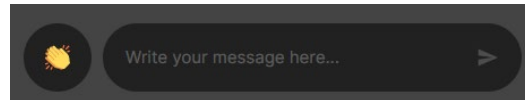

Practicalities

- Duration: 50 min presentation, 10 min Q&A
- Questions are encouraged!
 - Please type questions on the top of the right sidebar
 - All questions are anonymous
 - Try to keep them relevant to the topic
 - We will answer them toward the end
- The chat on the bottom of the right sidebar is not anonymous, and it should not be used for questions.
- Go to DevZone if you have more questions
- A recording of the webinar will be available together with the presentation at webinars.nordicsemi.com/on-demand

What is Power Management?

Next Generation Power Management

The One PMIC
To rule them all

Customer requirements drive complexity

- Reset and recover functions
- Long battery life
- Fast charging
- Accurate battery level over temperature
- Unboxing ready to use

So you'll need....

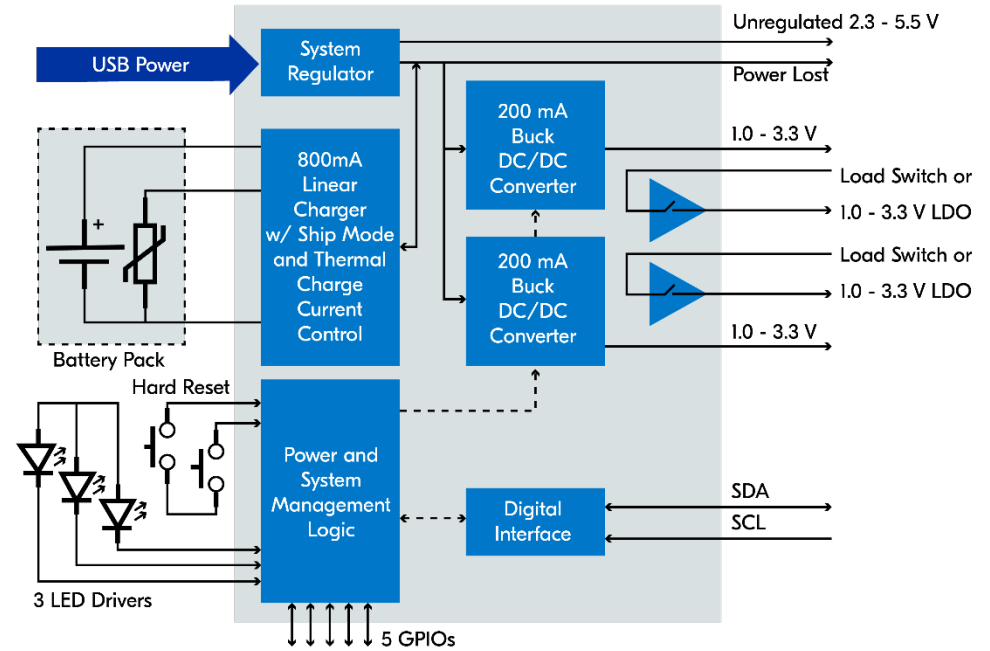

...this!

nPM1300

nPM1300

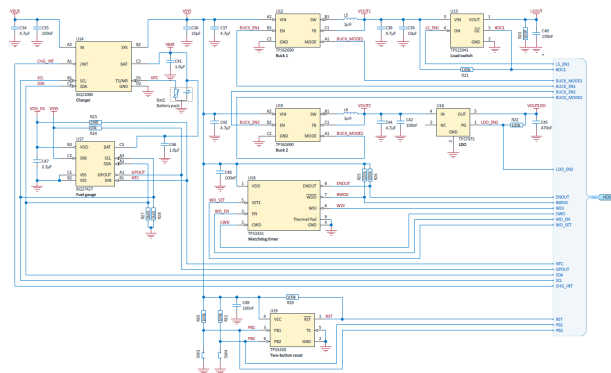

We took care of the complexity...

...so you don't have to

... VS ...

nPM PowerUP v0.9.0

nPM1300 Evaluation Kit

DASHBOARD CHARGER REGULATORS SYSTEM FEATURES PROFILES GRAPH FEEDBACK

Fuel Gauge Enable

Battery Status

Voltage 4.22 V

Current -173 mA

Temperature 24.70°C

Charging Mode Constant Voltage

Charger Enable

V_{BAT} 4.2 V

I_{CHG} 404 mA

Enable Recharging

I_{LOW} 10%

V_{THRESHOLD_VBAT} 2.9

NTC thermistor 10kΩ

Which one do you prefer?

Still lacking a lot of functionality...

nPM1300

A quick overview

Power Management

Two buck converters

Two load switches

Battery charger

USB-C input compatible

Ship mode

Fuel gauge

System Management

Recovery from
failed boot

Hard reset

Hibernate

Watchdog
timer

Power Loss
warning

5x GPIOs

3x LED Drivers

Configurable
through TWI

USB-C CC-pins

The most intelligent PMIC on the market

Failed boot recovery - Power cycle devices that hang before the watchdog is enabled

Hard reset - Use one or two buttons to power cycle a frozen device

Hibernate - Run a timer at nA currents until it's time to wake up

Watchdog timer - Adds an extra layer of protection

Power Loss Warning - Get to know when the power is about to fail

ACTIONS

- Export Configuration
- Load Configuration
- Open Serial Terminal 
- Reset Device
- Record Events

FUEL GAUGE

|------------|---|
| Software | <input type="text" value="V<sub>SET1</sub>"/> |
| V_{OUT1} | 1.8 V |

BUCK 2

Enable

| | |
|------------|---|
| Software | <input type="text" value="V<sub>SET2</sub>"/> |
| V_{OUT2} | 3 V |

Load Switch/LDO 1

Enable

| | |
|---------------|--|
| LDO | <input type="text" value="Load Switch"/> |
| $V_{OUTLDO1}$ | 1 V |

Load Switch/LDO 2

Enable

| | |
|---------------|--|
| LDO | <input type="text" value="Load Switch"/> |
| $V_{OUTLDO2}$ | 1 V |

nPM PowerUP

Power management at your fingertips

Quality of life for everyone!

No need to write code

For the Hardware Designer

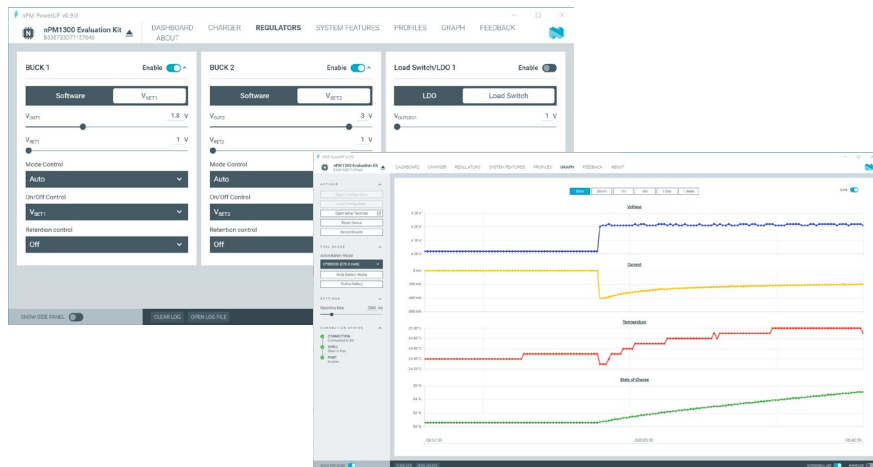

No need to study datasheets

For the Software Developer

Ease-of-use

Intuitive GUI

Complete integration

Configure → Export → Implement

Fuel Gauge

Enable

87.1%
