

Quuppa RTLS Platform

One System for Many Use Cases

June 15th, 2020

Quuppa Company Overview

- Founded in 2012, spin-off from Nokia Research Center, technology developed since 2005
- HQ in Finland; offices in Washington DC, Shanghai, Shenzhen, Beijing, Sydney and Dubai
- 170+ business partners (solution providers, system integrators, tag vendors,...)
- 2000+ systems delivered to 55 countries
- Key achievements in 2019;

Visionary in Indoor

Bluetooth Standard for Direction Finding Feature

Enhancing
Bluetooth Location
Services with
Direction Finding

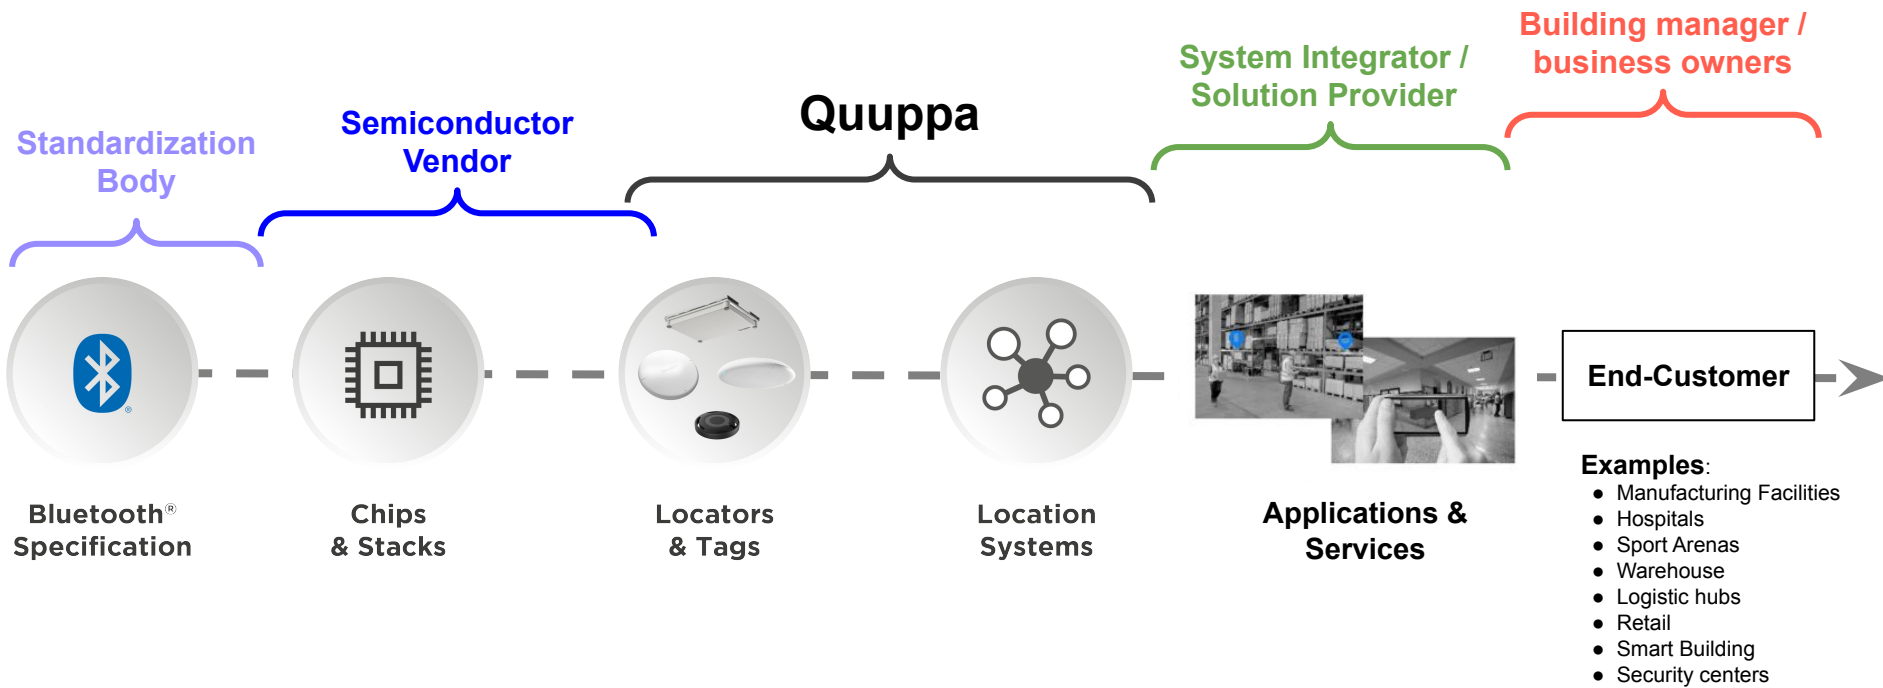

KIRKLAND, Wash. – January 28, 2019 – The Bluetooth Special Interest Group (SIG) today announced a new direction finding feature that holds the potential to significantly enhance the performance of Bluetooth location services solutions. The new feature allows devices to determine the direction of a Bluetooth signal, thereby enabling the development of Bluetooth proximity solutions that can understand device direction as well as Bluetooth positioning systems that can achieve down to centimeter-level location accuracy.

Bluetooth Direction Finding (5.1) Value Chain

Quuppa Intelligent Locating System™

Quuppa Intelligent Locating System™

Standard Bluetooth Low Energy (BLE) technology

Angle of Arrival (AoA) methodology

Advanced Positioning Engine

Advanced Software Tools

Positioning over Bluetooth: from RSSI to Direction Finding

For more information see the following articles:

- Tags are not Beacons: <https://quuppa.com/tags-are-not-beacons/>
- Bluetooth AoD as the Technology of Choice for Indoor Positioning Systems (IPS)
<https://quuppa.com/bluetooth-aod-as-the-technology-of-choice-for-indoor-positioning-systems-ips/>

Positioning Technology Comparison

	Quuppa (Bluetooth AoA)	UWB (RTT)	UWB (TDOA)	Wifi / Active RFID (RSSI)	Bluetooth Beaconing (RSSI)
Developed for Positioning	Yes	Yes	Yes	No	Some Profiles
Tag/Beacon Power Consumption	Very Low	Very High	Low	High	High
Accuracy	0.1m - 1m	0.1m - 1m	0.1m - 1m	5m - 20m	5m - 20m
Real-time	Yes	Yes	Yes	No	No
Smartphone Compatibility	Yes	No	No	Yes	Yes
IoT Gateway	Yes	No	No	Yes	No
Cost of Setup	Medium	Medium	Very High	Medium	Low
Cost of Ownership	Low	High	Medium	Medium	Medium

Key Benefits

Accurate

Versatile

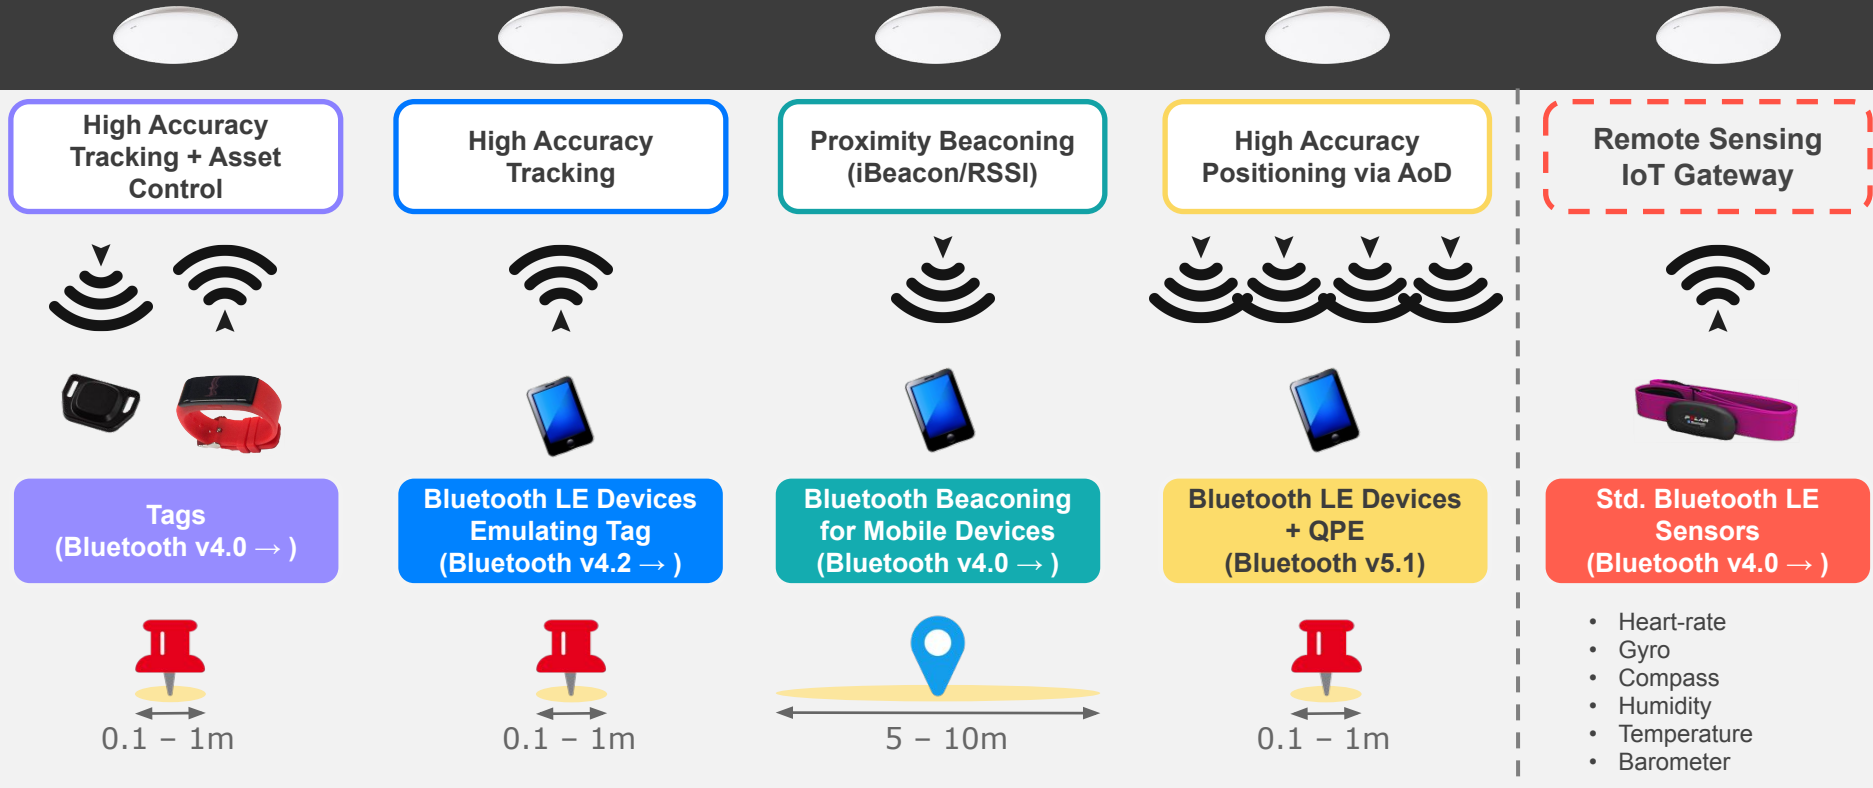

Scalable

Open

One Platform Enabling Multiple Use Cases

Key Features

Superior Accuracy

Open Tag Design

Long Battery Life

Real-time

IoT Gateway

Maintenance-free

Compatible

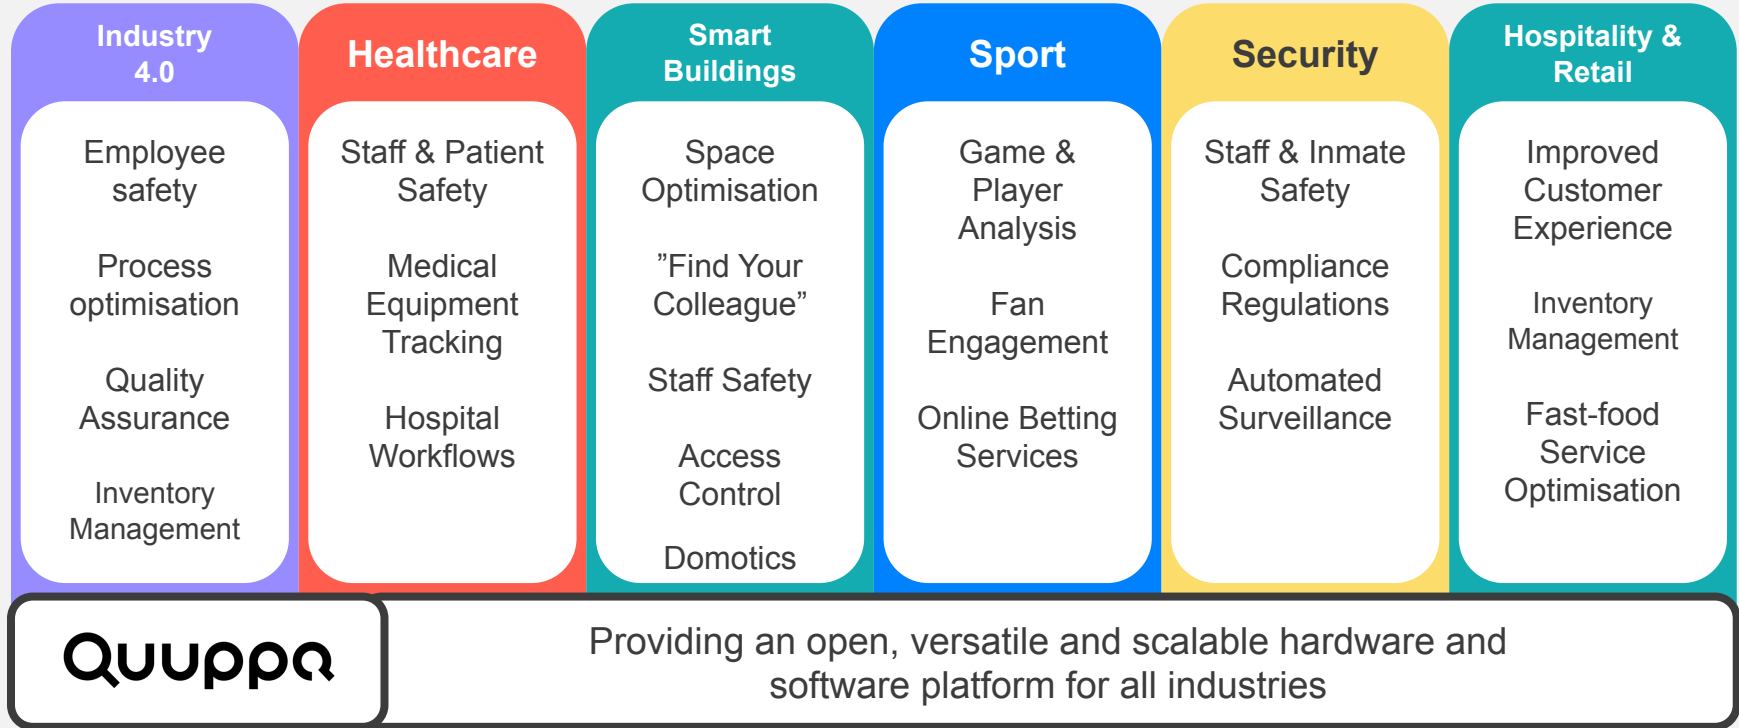

Open API

Interference-free

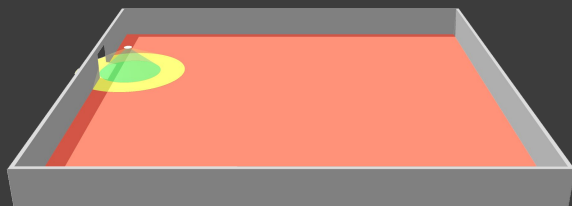

Versatile Solution Across Industry Verticals

Scalable Solution

PRESENCE "Building-level"

Inventory management

PROXIMITY "Zone-level"

Area/zone-level services

POSITIONING High-accuracy

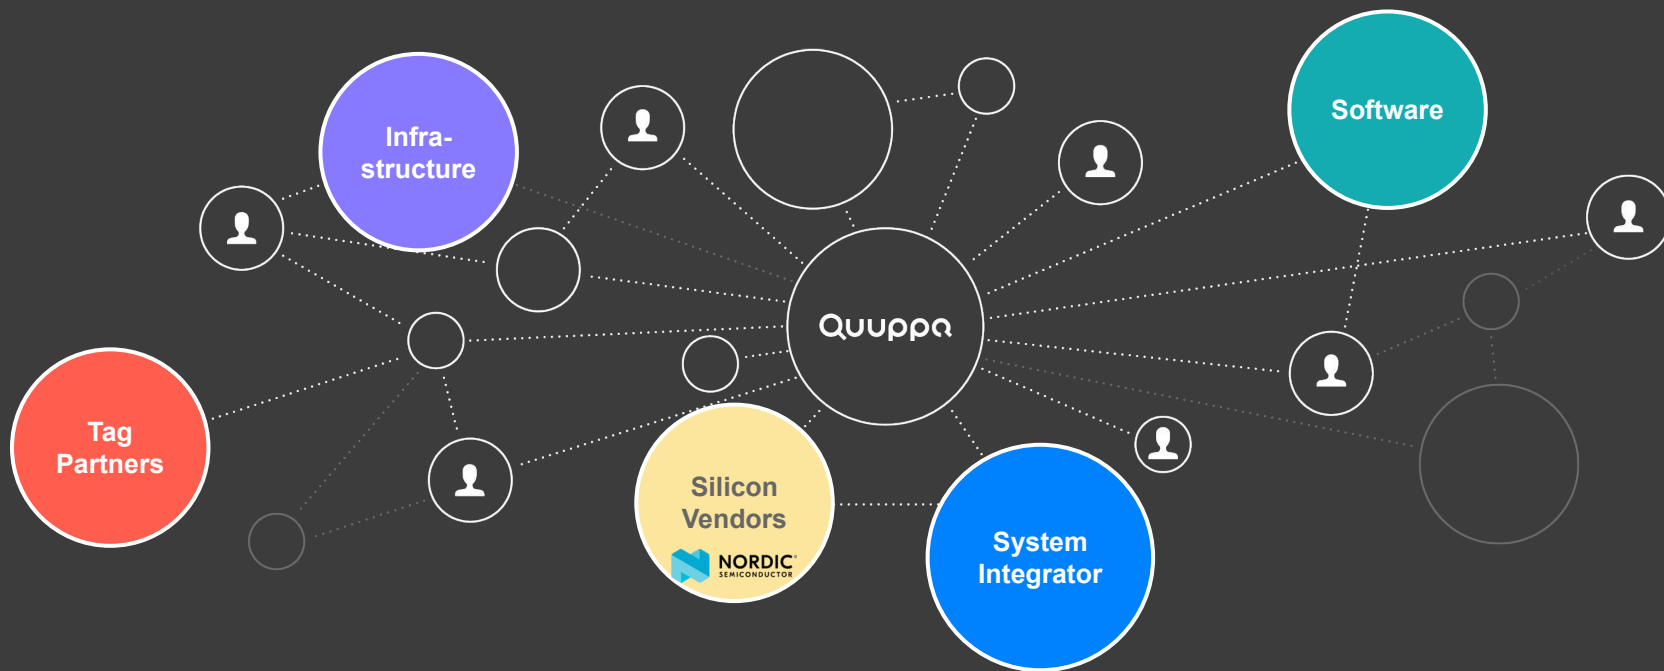

Process optimisation,
worker safety

Quuppa Partner Ecosystem

Quuppa Partner Ecosystem

Quuppa is a leading provider of Real-Time Locating Systems (RTLS) with 2000+ deployments in 55 countries & 170+ partners worldwide.

- Solution Providers
- System Integrators
- Tag Manufacturers
- Application Developers
- Hardware Manufacturers
- End Users

[View More About Quuppa Partner Ecosystem](#)

Quuppa Tag Ecosystem: Wide range of Tags, Sensors & Devices

Tag Partnership

- Access to the Ecosystem — Quuppa facilitates business partners acquisition
- New revenue streams — RTLS use cases scales up to 6-figures
- Quick time-to-market — with Quuppa Native nRF52xxx FR libraries
- Joint Marketing — www, webinars, exhibitions, newsletter, joint-PR, etc...

Q2/2020 HOT TOPICS:

- wearable with AI-fall detection, heart rate, and **vibration alert** capabilities
- highly visible LED for asset tracking identification
- barometer for asset elevation tracking
- ATEX-tags for intrinsically safe working areas
- 6-axis accelerometer & gyroscope

Tag Partnership – Eligibility?

- **Established company seeking to expand their business!**
- **Know-how** on embedded development, electronics engineering, and antenna design.
- **Experience** in bluetooth-sensor devices (even beacons)
- Capacity to **support** their customers and control production **quality**.
- **Own specialization** or value add in the ecosystem be it sensor, certification, form factor, IP/ATEX class. I.e. not yet another "low-cost asset tracking tag."

For more information please contact us at info@quuppa.com or directly santtu.pulli@quuppa.com

Quuppa Native Compatibility (nRF52-family)

- Quuppa Tag Partners can get access to the Quuppa FW Library for the nRF52832
 - accelerate development by leveraging the extensive Quuppa SW application API
 - operate on proprietary channels (2403 & 2481 MHz)
 - get all Quuppa Software Suite features natively supported
- Quuppa is extending the FW library support for the nRF52833/840
 - release schedule: Q3 (closed beta Q2)
- FW support for the nRF52811, and -810 also on the near term roadmap
 - planned schedule: Q3-4 (closed beta Q3)
- For future Nordic Semiconductor Bluetooth radios, we are working for making the Quuppa (DF) profile to be easily integrated with the Nordic nRF Connect SDK

For more information please contact us at info@quuppa.com or directly santtu.pulli@quuppa.com

Quuppa Natively Compatible Firmware for nRF52832

- **Full support of all Quuppa native system application features, including:**
 - Accurate real-time positioning (down to 10 cm)
 - Exposing onboard sensor data
 - Operation on Bluetooth ADV channels AND Quuppa proprietary channels (2403 & 2481)
 - Up to 50 Hz (20ms) TX rate
 - OTA configuration using Locators
 - Retrieve the Tag Data info via the native *QPE API*
 - Native back channel (uplink) support
 - Location based commanding (LED, buzzer, vibration, you-name-the-tag-side-action...)
- **Configure, Provision and Test Tag profiles with *Quuppa Site Planner (QSP)*:**
 - Transmit Power and Rate
 - Response time
 - Final State Machine logic (interrupts and timeouts)
 - Accelerometer settings (sample rate & sensitivity)
 - Data Payloads info (i.e exposed sensor data)
 - Also Zone-based Tag Profiles (automatically applied with OTA Location-Based Commanding)
- **Can be tested and approved by Quuppa to ensure quality and full compatibility with the Quuppa!**

Use Cases - Industry Examples

Asset tracking drives process efficiency, quality assurance

Manufacturing & Logistics

Inventory mgmt,
process optimisation
in factories and
warehouses

Construction

Tool tracking at
construction sites
for theft prevention
and process
optimisation

Healthcare

Inventory management
of mobile medical
equipment
(wheelchairs, beds,
crash carts,
defibrillators,...)

Maintenance

Tool & part tracking,
work order
digitalisation, quality
assurance

Retail

Inventory
management, click &
collect process
optimisation,
anti-theft solution

People tracking is becoming acceptable and even a “must have” in many industries

Industry 4.0

Worker safety in hazardous environments (man-down detection, vital sign monitoring)

Security

Access control preventing unauthorised entries in offices and highly secure places

Healthcare

Hand-hygiene compliance, assistance needed, fall detection, vital sign monitoring

Elderly care

Wander management compliance (elopement prevention of dementia patients)

Law enforcement

Inmate and guard safety (anti-assault, assistance needed)

Hospitality

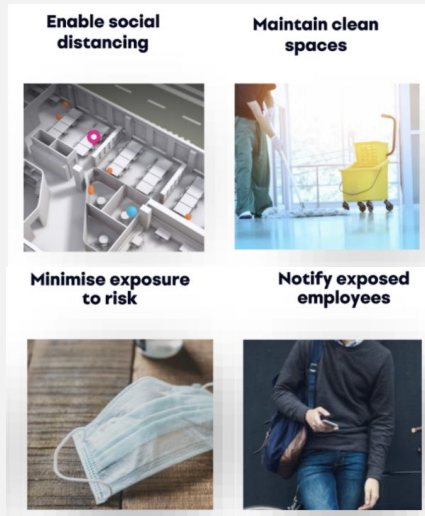

Hotel staff safety (cleaning, room-service)

Combating COVID-19 with RTLS

Social Distancing

Symbiosy platform

Combating COVID-19 with RTLS - Hand-Hygiene Compliance

- High accuracy real-time positioning
- Sanitation station - sensor triggered by usage
- Geofence areas around sanitation station and beds
- Real-time alerting (buzzer, light)
- Personnel tag, patient tag

Case study: University of Fukui:

"According to the University of Fukui Hospital, the number of times medical staff performed hand hygiene while attending to a patient increased by more than 300% as a result of visualizing the presence and timing of hand hygiene practices."

<https://quuppa.com/case-study-university-of-fukui-hospital/>

Summary

Quuppa unlocks the full potential of indoor location-based services without compromising accuracy, compatibility and cost.

Quuppa enables a Partner Ecosystem of infrastructure, devices and service providers to offer accurate indoor location services.

Quuppa is the pioneer of the Bluetooth Direction Finding for global indoor location services, with the current products being already standard-ready.

How to get started with Quuppa?

1. Tag Partnership:

- Ready to join?? <https://quuppa.com/partners/partner-tags/#TagContact>

2. VAR (Value Added Reseller) Partner - System Integrator and Solution Provider:

- Contact Quuppa or submit a request at <https://quuppa.com/contact/>

3. End-customers - e.g. Facility Operators, Building Managers, Business Owners

- Contact Quuppa for consultation at info@quuppa.com
- We are happy to put you in contact with our Partners' Ecosystem

Thank You
