### **Exportlicens for Products**

The Ministry of foreign have reviewed your productlines and have concluded that the following products are not subject to licensing p.t.:

nRF24x Series short-range wireless 2.4GHz RF ICs and Development kits  
nRF31x Series short-range wireless 2.4GHz RF ICs and Development kits  
nRF80x Series short-range wireless 2.4GHz RF ICs and Development kits  
nRF5x Series short-range wireless 2.4GHz RF ICs and Development kits  
nRF6x Series Development kits for Nordic short range wireless RF ICs

Norway has implemented a number of sanctions and restrictive measures. Exporters must ensure that they have a valid licence before any export of products, technology or services to which the licensing requirement applies.

The rules on export are subject to regular change and these products may at a later date be subject to licensing. Exporters are responsible for at any time complying with the current rules on exports of products to countries that are subject to arms embargoes or sanctions.

Regards

Karsten Konow
