Subject: Declaration of Export Control classification for Nordic nRF Products

Dear Nordic Distributor,

Nordic Semiconductor ASA hereby informs that according to exemption provisions in Norway/EU export regulations, our nRF products are not subject to export licensing. Thus, there will not be any applicable European ECCN number for our nRF products from Nordic Semiconductor point of sale, henceforth.

The applicable answer for Nordic products ECCN number in shipment process will be "Uncontrolled". However, it is possible to use 5A002.A until 31.03.2017 if desired.

After the date of 31.03.2017, distributors export compliance teams need to obtain US ECCN number, CCATS number or any other required licences if required.

Attached is the exemption letter decision from Norwegian foreign affairs department.

Yours sincerely,

Authorized signatory for Nordic semiconductor

Ebbe Rømcke
Quality Director
